here i want to load the pdf from db via id , the backend reponse is ok , but why it says
psd load failed ? here is
the backend response

1. {message: "Template fetched successfully",…}
   1. message: "Template fetched successfully"
   2. template: {_id: "67226de6701ed6bc487cf654", name: "Test Name", description: "test
desc",…}
